Company profile

A company like "Abeam," which provides business consulting services, assists clients in consulting with efficiency and foresight. by altering corporate procedures in order to develop internationally. Using "SAP," a business information management program, they have helped their clients face the challenges of global business transformation after more than four decades of service. "SAP" is capable of generating your earnings report, balance sheet, and cash flow statement with ease, among other functions. Using dynamic dashboards, any data can be easily filtered, magnified, and annotated.

Content Summary

The material provided and discussed in class today discusses a global business information management or enterprise resource planning application, such as SAP, that presents a sequential business process. such is the speaker's employment history Attend and participate in automotive distribution, automotive tier 1 and tier 2 production, and consumer products. You wish to design a system for resource management that can be readily inspected and audited. The use of digital transformation (DX), a technology that helps strategically adapt the foundation and management of an organization and boost organizational efficiency in order to stay pace with the global economy and avoid digital disruption, has altered the modern business landscape. In addition, the lecture covers the industry's transformation, which has occurred at a quick rate relative to other industries. But because of the COVID-19 event, many industrial businesses have been significantly impacted, as customers face financial difficulties and reduced spending, production problems that must be halted, shipping delays because of the country's lockdown, and delays in the importation of many resources. which, in this instance, to transform the company for it to survive, it is vital to discover business solutions such as business priorities in the new normal period, which consist of four basic principles: operation flexibility, supply chain intelligence, cost optimization, and customer orientation. SAP provides business planning in a number of situations within an environment that is susceptible to change. It encompasses work efficiency and is fully internationalized. In addition to the Abeam Graduate Analyst Program, Abeam also provides a program for students interested in the Abeam Graduate Analyst Program. The minimum GPA to get in is 2.75, and you have to be able to think logically, speak Thai and English well, and want to work with digital solutions like SAP.
